EDUCATION

Govt Gordon College (Affiliated with UOG)   **September 2020 - 2024**
Bachelor of Science in Information Technology (BSIT)   **CGPA : 3.03**

SKILLS SUMMARY

- **Languages**:   TypeScript, Python, C/C++, Java, Php, HTML, CSS, SQL
- **Libraries**:   ReactJs, Next js, React Native, Redux Toolkit, Tailwind, Material UI, Styled Components
- **Tools**:   Node, NPM, Vite, Git, Firebase, Expo
- **Soft Skills**:   Excellent communication, Troubleshooting, Problem Solving
- **Version Control**:   Git, Github,

WORK EXPERIENCE

EON Weave Labs
- **Full Stack Developer**
  - Handling multiple Projects for both, Frontend and Backend working according to the requirements.
  - Collaborated with cross-functional teams.
    (Next.js, MongoDB, NodsJS, Firebase, ShadCN)

Thathal ITS
- **Associate Software Engineer**
  - Developed RESTful API that handled user authentication and profile management
  - Implemented data modeling and query optimization techniques in PostgreSQL to improve performance
  - Collaborated with cross-functional teams.
    (Next.js, Postgresql, materialUI)

EV Square
- **Web Developer Internship**
  - Worked as a team lead.
  - Developed and implemented user interface for the company.
  - Collaborated with backend developers to fulfill requirements.
    (React.js, tailwind)

CS Networks
- **Computer Science Instructor**
  - Teaching students about Computer Systems and Programming languages.
  - Dealing with clients
  - Troubleshooting hardware and software problems
  - Managing Systems

PROJECTS

SellioAMZ
(ReactJs, Tailwind, Firebase)

- Product analytic tool for amazon sellers
- Developed WebApp and Chrome Extension
- Managed api calls for seamless backend and database services.

MindCanvas AI
(ReactJs, MongoDB, NodeJS, ExpressJS)

- Document and slides generation tool using OpenAI's API.
- Managed api calls for seamless backend and database services.

Dental Shelter
(Next Js, Node, Express, PostgreSQL)

- A US based platform, for dental professionals.
- Worked on the UI for a visually appealing look.
- Managed api calls for seamless backend and database services.

SafeDrive Alert
(Kotlin, OpenCV, Google's MLKit)

- Created an android application for driver's safety with real time drowsiness detection and road lane detection.
- Designed a simple and interactive user interface for better user engagement.
- Alerting the drivers if they are drowsy or if they exceed speed limit.

eDukan
(HTML, CSS, JavaScript, PHP)

- Developed a user-friendly e-commerce website with intuitive navigation and responsive design.
- Implemented backend services using PHP to handle user data and product management efficiently.

CeaserCipher
(HTML, CSS, JavaScript)

- Created a web application for encrypting and decrypting text using the Caesar Cipher technique.
- Designed a simple and interactive user interface for better user engagement.
- Implemented encryption and decryption algorithms in JavaScript for educational purposes.
